DETAILED ACTION
EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claims 5-10 have been cancelled.

Claims 5-10 were withdrawn from consideration based on the Restriction election of Group I claims 1-4 filed by applicant on 27 December 2005. The Office action Mailed 13 March 2006 stated that the restriction election was determined to be made without traverse since there was no argument showing the defects of the original restriction. Therefore the withdrawn claims have been canceled to put the instant application in condition for allowance.

Allowable Subject Matter

Claims 1, 3, and 4 are allowed.

Reason For Allowance

The following is an examiner's statement of reasons for allowance:

The prior art fail to disclose or suggest a glass composition having the composition as recited in the instant claims. Specifically a method for reducing the defect density of the glass produced by the float glass method wherein the glass composition consist essentially of the components as recited in the instant claims, which result in the recited properties. See Applicants' remarks filed 15 June 2006 pages 6-12.

The closest prior art is deemed to be EP 1 041 050 A1 by Cochran et al. Cochran et al. disclose a similar composition but requires the presence of erbium oxide to be present in the glass. Applicants' successfully argue that the addition of additional coloring components would materially affect the instant composition. See Applicants' remarks filed 15 June 2006 pages 6-12.
